
NEWTEC

Model 2009A/VB40CAE

MULTI-HEAD WEIGHER with AUTOMATIC POLYBAGGER
combines high output with low give away

- Robustly constructed in stainless steel
- Patented design for gentle handling of delicate products by a unique brush and soft belt system
- Gentle rotating brushes prevent bridging across infeed channels
- Simply cleaned
- Pack weight programming in seconds
- Fully automatic infeed control
- Automatic taring
- Capable of running with one or more channels disabled
- Automatically controlled feeding system
- Count by weight programme included
- Reversible cross conveyor for product feed into other systems e.g. net, trays, etc.
- Uses standard wicketed bags which can be changed in seconds
- Support plate which gently lowers the product down into the bag
- "No bag or tape – no product" system
- Reliable tape closure system
- Self diagnostic electronics

OPTIONAL:

- Top trim system for perfect presentation
- Label printer / applicator and tape printer
- PC connection for data capture

THE LINE IS DESIGNED FOR GENTLE WEIGHING AND PACKING OF APPLES
